Jean Macena

About me Between 2014 and 2015 I was a participant in the Brazilian Scientific Mobility Program for undergraduate students in the United States where I obtained English skill. I am a passionate software engineer with years of working experience in Web Development and Automation. Sometimes, I work on some fun and social projects and such as www.ulna.org

Experience

Mar 2020, ThoughtWorks - Developer

I am a Batch 70 participant at ThoughtWorks University. I have worked as a fullstack developer in Web projects and developing skills in other stacks such as mobile IOs. Participation and facilitation of agile ceremonies and role of client face.

Jul 2017 - Set 2018, UNA Project - Web Developer

Back-end developer responsible for developing functionality for the UNA Project - Gender Equality and Women's Empowerment Ecosystem Initiative for a UN Women, Womanity, Brazil Foundation and C&A Institute initiative.

Apr 2017, Accenture - Software Engineer

Preparation and execution of test automation projects in UFT-HP. Performing functional tests and billing from the unification of NET, Embratel and Claro. In the Yahsat QA project, I performed the role of facilitator and executor of the test demands on the Oracle Cloud platform, working along the client in prioritizing sprints and supporting the local team in performing the tasks that would involve the external supplier of the operation. In the Yahsat Operation & Performance Maintenance project, it is level 2 support for solving production incidents, troubleshooting Oracle Cloud (CPQ, TOA, SVC, OSC and ICS) and SOA together with joint customer engagement and external vendor about bug fix applications and solution changes.

Jan 2016 - Dec 2016, PRAE-UFRPE - Web Developer

Acting as a developer in a project at UFRPE and focused on the entrepreneurial ecosystem of Recife. Responsible for the implementation of the requirements raised during the Manguezal Base platform planning.

Jan 2014 - Ago 2014, Zaité - Web Developer

Back-end developer responsible for supporting and improving projects prior to my arrival, I was commissioned to plan and implement requirements that would meet the needs of new customers.
